DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Helferich, U.S. Patent No. 6,259,892.

Regarding claims 1-21, Helferich discloses a method comprising receiving a message-notification into a wireless communication device (WCD), via cellular wireless air interface, the message-notification indicating a data message (text, audio, voice, video, graphics) stored in a data network (abstract and col. 8, lines 15-65, col.15, lines 37-45, col. 16, lines 31-39); passing an indication of the message-notification from the WCD to a computer locally connected with the WCD (acknowledgment message), responsively sending a message-retrieval request from the computer to a message server over a communication path that does not include the WCD and that does not include the cellular wireless air interface; receiving the data message into the computer

in a response to the message-retrieval request (col. 12, lines 32-67)., and rendering the received data message for presentation to a user as evidenced by the fact the receiver of the message can retrieve the message through various means such as calling into the PSTN or accessing the Internet (col. 16, lines 21-30).
